

TimeWise Body Hand and Décolleté Cream SPF 15*

Minimizes the appearance of crepiness and helps skin look firmer.

Hydrates and supports the skin barrier, helping to reduce the appearance of fine lines and wrinkles.

Helps reduce the appearance of dark spots.

Provides broad spectrum UVA/UVB protection. The Skin Cancer Foundation recommends this product as an effective UV sunscreen. It may also help reduce the potential risk of skin cancer due to overexposure to sunlight.

Quick-absorbing cream feels rich without leaving skin feeling tacky or greasy.

Dermatologists often call the hand and décolleté areas “giveaways” because they can so readily give away your age. It’s never too late to give the skin in these areas the special attention and protection it needs for a healthy, younger look.

The skin on the back of the hands is relatively thin and fragile, just like the skin around the eyes. And the décolleté area (the neck, shoulders, and chest area), like your hands, gets a lot of sun exposure. Hand and Décolleté Cream Sunscreen SPF 15* was formulated with several effective ingredients that combined together deliver the most dramatic benefits to these two vulnerable areas.
